

Most businesses are faced with the challenge of securing, centrally managing and quickly disseminating critical business information. Businesses spend considerable amounts of time and money in locating the most recent as well as historical records of their business critical documents. LuitDox Enterprise is a web-based document management system for sharing documents across different user groups via a web browser that can help businesses tackle this challenge efficiently. The system can be used by companies and organizations for sharing documents. LuitDox Enterprise can be deployed over the Internet or over an Intranet (LAN).

FEATURES

- * Web based document management
- * Organized user management
- * Hierarchical file structure
- * Comprehensive "Search" mechanism
- * Access control
- * Built in version control system
- * Historical records of documents
- * Knowledge base associated with documents
- * Document Tagging and Publishing
- * Easy to use interface
- * Documents alerts and reports
- * Integrated Workflow Process

BENEFITS

- ✓ Manage documents efficiently
- ✓ Avoid loss of business critical documents
- ✓ Robust, scalable and affordable document management
- ✓ Built-in version control maintains audit trail
- ✓ Access controlled security to protect content
- ✓ Easy access to different versions of documents
- ✓ Document related knowledge base for future reference
- ✓ Critical information on the go
- ✓ Cost savings through structural changes in the way documents are organized, communicated and stored

LuitDox Enterprise Modules

LuitDox Enterprise consists of two modules - user module and admin module.

User Module: The user module can be used by both internal users (e.g. organization personnel) and external users (e.g. organization's clients).

Admin Module: The admin module can be used for managing LuitDox Enterprise users and for broadcasting messages to all system users.

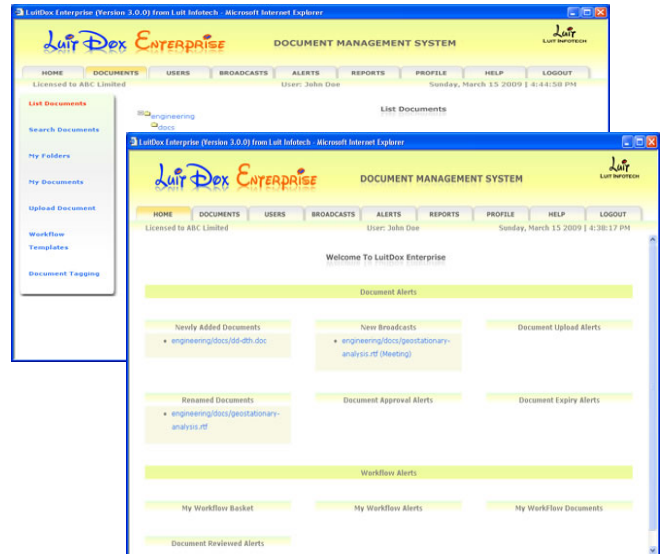

Training for customers after implementing LuitDox Enterprise

LuitDox Enterprise has an intuitive and very easy to use interface. Additionally, it comes with a comprehensive user guide that explains all features and functionalities of the system in detail. So, there is hardly any need for user training.
